

## Industrial grade premium brush grommet for your data centre

### Features

**Double-row brush segments** for excellent air and dust sealing.

**UL-94 V0 certified** flame retardant ABS plastic that meets the most demanding requirement.

**Simple two part system** for easy installation and removal.

**Rugged construction** using aluminium and ABS plastic with long service life..

**German engineered and produced** brush grommets with the highest quality materials and precision.

EziBlank® Premium Brush Grommet is developed for sealing raised flooring in climate-controlled rooms and for cable management. The double-row brush segments in offset configuration provides excellent sealing. The brush grommet can be used to seal cable passages to prevent leakage and keep cool air under the raised floor.

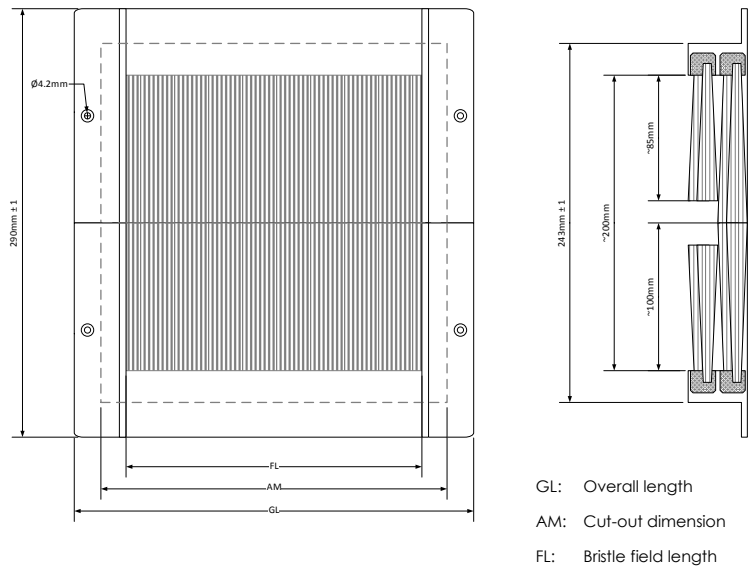

EziBlank® Premium Brush Grommets are available in three different sizes to fit variety of applications.
