

PRODUCT SAFETY INFORMATION

Product Name: EziBlank Rack Substitute Wall
Product P/N: EZW46U-01PNL02

Intended use: EziBlank Wall is a temporary structure designed as a temporary, removable rack substitute panel for hot/cold aisle air flow management in data centre. The product is not to be used as weight bearing structure under any circumstances and EziBlank will not be responsible for any damage or injury caused by incorrect use of the product.

Safe use instruction:

- Once installed, the product is not to be leaned on or exerted with external force or weight.
 - Optional EziBlank Wall Feet (ordered separately) can be installed to provide additional support and reinforcement to prevent displacement only, the product remains a non weight bearing structure as per its intended use.
 - For installation of 4 or more Wall panels in a row, it is recommended that a suitable trim angle be installed by a qualified trades person to provide further security and prevent displacement.
-
